

Downlight indoor fluorescent

Downlights for fluorescent lamps

The indoor fluorescent downlights come with a wide range of decors. The décor elements are made in painted, chromed or brushed steel, brass, aluminium, glass and acrylic. We offer a variety of reflectors in white baffle, PC or aluminium. They are easy to mount and it is easy to change light source and décor. Some of the downlights are designed for use in B0/B15 ceilings.

All internal wiring is double insulated and halogen free. The downlights can be supplied with up to 3 hours integrated battery backup. The DL90 is a modern adjustable and slim downlight. It is applicable for a variant of light sources. It is easy to install and has one cut-out for the family. DL90 runs on low energy and has a long lifetime. It comes with a wide range of trims.
